

Local Area Network Services

Expert design – Leading systems – Reliable deployment

Getting the most out of your IT investments, the local area network will make or break how successful any IT improvement project is. Our LAN design and deployment services ensure your local area network is secure, reliable and flexible to suit the needs of your users.

Data sheet

Service overview

RM's LAN services deliver wired and wireless design and deployment services that ensure seamless, reliable and secure connections from device to the internet. With more resources being hosted in the cloud, your internal connectivity has never been more important.

With multiple options around configuration to get the most out of your network, it's not as simple as plug in and go. Our team will help design the right setup for you, whether it's installing a core switch to replace the old or overhauling the entire local area network, we've been designing and deploying network infrastructure for more than 25 years, we can help you build the solution you need.

Business outcome	Benefit
Improved user experience	Implement the latest in wired and wireless technology with the latest features delivers better experiences for end users.
Reliable coverage	Build confidence in the use of IT anywhere. Ensuring all areas are suitably covered with wireless and that wired connections are load appropriate for the area they are serving.
Secure access and traffic	Configure the network to keep traffic separated ensuring a more seamless experience while building a layer of security into the network.
Simple but strong access control	Ensuring the right users and devices have the right access to the network and that access is easily traced and controlled delivers robust security to your network.

“The way that technology is used has changed massively over the last half-century and RM has been there every step of the way, providing trusted support and guidance to schools.”

Leora Cruddas, Confederation of School Trusts

Key service features

Working with the enterprise grade networking vendors

- ✓ We work with top tier networking vendors ensuring systems deployed are feature rich and high-performance solutions.

Education specialist, networking expert design teams

- ✓ Our solution designers are education experts as well as networking experts and able to design solutions that suit all sizes and types of school.

Management and support

Our accreditations

Working with RM you can be assured that you will receive a high-quality service alongside our expertise and knowledge of supporting schools with their technology. Our school IT services are backed up by a range of educational and technology accreditations and partnerships.

Why RM?

Smart

Innovation is at the heart of our business, and we continue to explore advanced technologies, bringing to market pioneering ideas that respond to shifting educational tech needs in an unpredictable world.

Secure

Cyber threats are a major & growing concern for any trust or school. Our portfolio of IT security services mitigate the risk of a cyber-attack by highlighting vulnerabilities, implementing solutions & building resilience through training to improve your security posture.

Safe

The safety and safeguarding of our students is at the forefront of our minds and is the number one consideration when designing and delivering our IT services. We are setting the standard in the industry for safe use of technology in and out of the classroom.
