

# Digital Skills Review

Professional Survey – Benchmarked Report – Education Focused

Technology use is expanding, and tools are changing all the time. Keeping teaching staff up to date is more important now than ever before. The **Digital Skills Review** is the first step to identifying any knowledge gaps and increasing staff confidence in leveraging technology.

Data sheet

## Service overview

The Digital Skills Review gives you a snapshot of the current knowledge and skills within your organisation around digital technology.

Our survey is designed and delivered by educational consultants with current expertise in driving digital transformation across schools and trusts.

The service offers the design and creation of an online survey, a report covering readiness for change, awareness and understanding of tools and proficiency in the use of tools. This is broken down by school and role to be able to pinpoint areas for improvement.

Business outcome	Benefit
Improved clarity over staff skills	Through holistic reporting understand where your staff are in terms of getting the most out of the technology that is available to them.
Benchmarking data	Review where you are against other trusts and schools in England through the RM benchmarking data around the use of digital tools.
Change readiness awareness	Understand how ready for change your staff are when planning a programme of new technology implementations.
Feed your strategy with expert insights	Talk with our educationalist experts about what you could do to support your vision and build a strategic plan to help work towards that vision.

*“For us, RM were there when we needed them, providing help and advice, and keeping us informed. We are teachers and educationalists – we are not technologists – I just don’t see how a school could have done this without a partner like RM to call upon”*

Tracey Parsons, School Business Manager, Brockmoor Primary School
