Fibre
Broadband through SWGFL

410
students

35
staff

100
devices on network

"We wanted to change our broadband as we needed a reliable connection to support our vision for ICT. We will be completely cloud based by Christmas and with extra devices putting pressure on the network, we needed more speed and a more reliable service. The Project co-ordinator listened to our requirements and then gave us all our options, which allowed us to make an informed decision.

Throughout the install, the communication between RM and our school was outstanding. The RM project co-ordinator was instrumental in the smooth transition away from the LA.

We've really noticed the personal service that we get with RM. There's a face that we are familiar with - real people with real faces to help every step of the way.

My advice to other schools wanting to move away from their local authority would be to just do it - we didn't realise how easy it would be."

Tracy Broadbent
School ICT Technician

"Our new broadband connection has made a real difference to our school. It's given the staff the confidence to move forward with cloud based teaching and learning. We now have an Internet connection we can trust and are used to it 'just working'. I sometimes have to remind people how bad it was only a year ago."
